

Crumb

The Milk Choco Crumbs are produced in Switzerland from milk, sugar, and cocoa mass, then pasteurised, dried, and finely ground. Used primarily in chocolate production, they can replace part of the milk powder, sugar, and cocoa. This process gives chocolates and fillings a distinctive creamy caramel note. The Milk Crumb Blond, made with cocoa butter, provides a lighter profile for blonde and caramel chocolates.

The assortment also includes certified options.

Article name	Cocoa %	Saccharose %	Cocoa Butter %	Total fat %
Milk Choco Crumb	13.1	44.8	7.4	18.0
Milk Choco Crumb 37	6.5	55.7	3.7	12.0
Milk Crumb Blond	3.0	68.0	3.0	11.0
